UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

SUBJECT: ISS Inspection at Fansteel Metals, Muskogee, Oklahoma  
EPA I.D. #OKD007221831 on January 9, 1981

FROM: Diana Dutton  
Director, Enforcement Division (6E)

TO: Bill Librizzi  
Director, Surveillance & Analysis Division (6SA)

We have received and reviewed the subject inspection report. Further, we anticipate proceeding with enforcement actions against the facility for violations of RCRA regulations.

After reviewing the report, we must note to you that the report was lacking significant information pertaining to the operation of the facility. Specifically, information concerning (1) the waste analysis, (2) site security, (3) inspection scheduling, monitoring, (4) ignitable, reactive, or incompatible waste handling, (5) condition of container, and (6) status of a written operating record was not given in the report even though it was necessary to properly evaluate the facility.

We are proceeding with enforcement actions where it is clear the facility was in noncompliance with RCRA. It is my intention to just notify you of this poor inspection report.
